

Maximise Your Grow Room Bio-Security with a Certified UK-Made Ozone Generator

One Unit. Three Powerful Applications. Full Compliance.

Why Settle for Less?

Most ozone generators only do one job — ours does three.

At no extra cost, you get a **room sanitiser**, **odour control unit**, and **water purifier** in one compact, UK-manufactured system.

Ozone Use is Now Regulated Under the GB Biocidal Products Regulation (BPR).

Is your current supplier taking the right steps toward compliance?

Understand what compliance requires

work with experts who truly know the regulations.

✓ 1. Grow Room Sanitisation

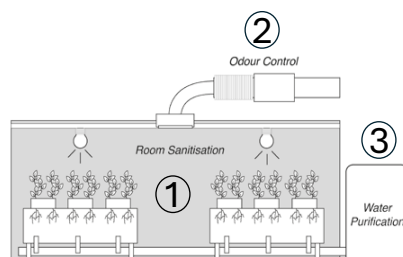

- Destroys bacteria, mould & viruses in air and on surfaces
- Use between crops for total room disinfection
- Enhances plant health and viability
- Works with extract systems to safely remove ozone

✓ 2. Odour Control (Injected into Ducting)

- Oxidises and polishes persistent odours
- Installs after your carbon filter
- Quiet, low energy, portable, easy to service
- Long-lasting (kept out of dirty duct airflow)
- **Made in the UK**

✓ 3. Water Purification

- Kills bacteria, mould & viruses in irrigation systems
- Increases redox potential & oxygen content
- Circulates disinfected water to clean pipework
- Ideal for high-performance hydroponic setups
- Used for Biofilm removal

✓ The Smarter Choice

- **Certified and UK-made**
- **Low energy, portable, quiet**
- **One cost. Three applications. Total compliance.**

Specification – AM6000

Ozone Output	AM6100 – 1000 gm/hr AM6200 – 2000 gm/hr 10L per min pump
Dimensions	450mm (L) x 200mm (W) x 220mm (H)
Weight	3.6 KG
Voltage/ Freq.	220V / 50 – 60Hz
Watts	100 watts

Ozone: Myths vs Facts

Claim	True/False
Ozone is safe for plants at high levels	✗ False
Kills bacteria, mould, and viruses (air/surfaces)	✓ True
Kills bacteria, mould, and viruses (water)	✓ True
Doesn't affect nutrients in water	✗ False
Improves oxygen levels in water	✓ True
Destroys all odours	✗ False
Ozone is chemical-free	✗ False
Ozone is environmentally friendly	✗ False
All generators produce what they claim	? Maybe
Humidity affects ozone output (corona units)	✓ True

⚠️ Ozone Use in the UK – Soon to Be Regulated

Under the **GB Biocidal Products Regulation (GB BPR)**, ozone generators used for disinfection **will need to be HSE-registered**.

<https://www.hse.gov.uk/biocides/about/in-situ-generation.htm>

Our products are covered under the European Ozone Trade Association's Biocide application.

For more information, visit: www.euota.org and for detail of suppliers visit

<https://www.euota.org/uk-registration-group>

Not seeing your supplier listed? Find out why.

If you're using an uncertified generator, **you're not compliant** — and potentially putting your grow room at risk.
